

Time saved is the input. Brand velocity is the outcome.

Four hours a week was the problem we were handed, not the goal. The hours only become value through two doors — the CSM reaches a brand's target sooner, and carries more brands. Every tier below is marked with what we can honestly claim about it.

CORE PRINCIPLE
Faster to goal,
across more brands

THE OUTCOME LADDER — READ DOWN TO TRANSLATE, UP TO EXPLAIN

T1
COMMERCIAL

Revenue influenced · leads converted

Pipeline and closed revenue from organic and AI-search sessions, read from the client's CRM. What the retainer is judged on.

CORRELATIONAL

T2
PLATFORM

Share of voice · AI citations & mentions · impressions · clicks

Tracked as a time series, not a monthly snapshot — share of voice *rising over time* is the claim.

MEASURED

T3
VELOCITY
★

Time-to-target · goal attainment rate

Weeks from goal-set to goal-hit, against a matched cohort of pre-Atlas accounts. Not "did SoV rise" but "did it rise *sooner*".

VS. COHORT

T4
LEVERAGE

Brands assisted per CSM · assist depth

Accounts held at cadence-compliant quality, and how many get a recommendation rather than just a report.

MODELLED

T5
EFFORT

Minutes per approved report, decomposed by panel

The original four hours. Necessary to prove, insufficient to celebrate.

MEASURED

TIME SAVED, BY PANEL

SOURCE

Pulling and checking raw data — **target → 0**

CANVAS

Editing the draft — **falling = draft quality rising**

EVIDENCE

Verifying claims — **a floor, never zero**. Zero is rubber-stamping, not speed.

APPROVE

Last edit to decision — the residual

HOW WE'D KNOW IT SAVED THE FOUR HOURS

MEASUREMENT

Stepped-wedge clustered on the CSM — 8 weeks, 4 cohorts, pre-registered mixed-effects model. Weeks 0-2 set the baseline first.

DATASET

60 golden reports (12 clients × 5 periods, frozen snapshots), plus 15 rewritten by 3 senior CSMs for a measured human ceiling.

SUCCESS CRITERIA

Faster **and** no worse — time superiority plus quality non-inferiority, margin derived from inter-human SD. Then ≥ 70% still choose it when it goes optional.
